Subject:	RE: EPANET updates

Regan,

Lew did not provide the setup files for the install package. So I guess we can just change the name on the website and in the release notes.

Did you talk to Rob James about setting up an Open EPANET website?

OK, great, what about putting the new Delphi EPANET up on our website? I think you were going to try to rename it to 2.012B or something like that.

Hi Regan,

I have been working with Lew and the other OWA volunteers getting the code there in shape for a release by the end of the year. There is a lot to do!

Lew sent us an updated install package for the EPANET 2.0.12 Delphi UI on 9/5/2018.

I have not been working on posting the User's Manual. I thought you, Hyoungmin, and Jon were doing that.

Not sure what you mean ... everything is fine with the testing framework. It has been in production at OWA since this Spring and has been running reliably.

I continue to make progress on SWIG based python wrapper packages for SWMM and EPANET.
https://github.com/michaeltryby/epanet-python
https://github.com/michaeltryby/swmm-python

I just finished adding support for metadata that is used by the new UI. Parts of the swmm-python package are already being used by the Respec guys.

Subject: EPANET updates

Hi Michael,

Can you update me on the following?

Where are we with posting the new version (with updated Delphi) from Lew on the EPA website?

What is the status of posting the UM on readthedocs? Have you been working with Hyoungmin and Jon on this?

Also, is anything new with the testing framework? What would need to be done to get the testing framework in good enough shape for an official release in December?

Thanks so much. Have a great weekend.

Regan
